

## **Department of Electrical and Electronic Engineering**

### **Program of Communication Engineering for Class 2018**

#### **I. Introduction**

Communication engineering, especially wireless communications engineering, has become extremely important throughout the world and in particular for Shenzhen, which is recognized as a world-class center of communication industry. With the increasing demand on mobile data access, the development of next generation broadband communication systems has been initiated, which would boost up career opportunity in related academic and industrial fields. The offered 4-year undergraduate program on communication engineering is tailored for the most cutting-edge areas in communication engineering. In addition to lecturers and labs, students are also encouraged to work with supervisors on real research problems as early as the second year of the program. The key areas under study include: classic and modern communication theory, microwave engineering, wireless communications, optical communications, computer networks, embedded systems, microwave imaging, etc.

#### **II. Objectives**

The Communication Engineering major aims to cultivate students with solid fundamental theory of communication engineering, modern communication technologies and related R&D capabilities, abilities to use English and computer, and being engaged in science research, engineering design, equipment manufacturing, network operations and technology management in the field of information and communication, as well as in various fields of national economy related to Information Communication Technology (ICT). Upon graduation, the students are expected to work in wireless communication, antenna and microwave engineering, information engineering, integrated circuit and communication system design, research and development, and continue post-graduate education in communication engineering, microwave engineering, information engineering, or pursue research, development, education, and management positions at a broad spectrum of enterprises, research institutes, and universities.

#### **III. Study Length and Degree Requirements**

Study length: 4 years

Degree conferred: Bachelor of Engineering

The minimum credit requirement for graduation: 137 credits (not including English courses).

#### **IV. Discipline**

Major Disciplines include Communication Engineering, Electronic Engineering, and Information Engineering .etc.

#### **V. Main Courses**

Core courses include Signals and Systems, Series of courses concerning Circuit Theory and its Application, Engineering Electromagnetics, Digital Signal Processing, Communication Principles, Wireless Communications, Antennas and Radio Propagation, Fiber Communication, Data Communication and Networking, Series of courses concerning Communication System Design, Microwave Engineering .etc.

#### **VI. Practice-Based Courses**

Core practical training includes Industrial practice, Advanced Electronic Science Experiment (It is a subject elective course. Outstanding students after their junior year, can join research working with their professor), and all sorts of domestic and international academic and innovative competitions.

#### **VII. Course Structure and Credit Requirements**

General Education (GE) Required Courses: 51 credits (not including English courses);

General Education (GE) Elective Courses: 10 credits (4 credits for Humanities Module, 4 credits for Social Sciences Module, and 2 credits for Arts Module);

Major Foundational Courses: 31 credits;

Major Core Courses: 15 credits;

Major Elective Courses: 18 credits;

Undergraduate Thesis/Projects, Research Projects and Internship: 12 credits;

The minimum credit requirement for graduation: 137 credits (not including English courses).
